

Web Based Trail App – Data Sheet

Pelican Bluffs Preserve and Coastal Trail

This stunning preserve, south of Point Arena, is now open to the public. Mendocino Land Trust (MLT) completed construction of a parking lot and 2.2-miles of trail in 2017. This 73-acre preserve is home to the endangered Point Arena Mountain Beaver and several rare plants, as well as a creek (which is recovering from cattle grazing) and Bishop pine forest. There are spectacular ocean views from very high white cliffs on the property- these cliffs are very steep, making it essential to stay on the trail. Now that the trail is open to the public, MLT will host monthly volunteer stewardship workdays to maintain the trail, pick up trash, and remove invasive plant species. If you would like to help out, please contact MLT, or check out this beautiful video of the property before your visit:
